## Health and Peace of Mind

Important to all of us! The CrystalClear Home provides fresh, clear water for drinking, cooking, and cleaning for your entire family. Our system delivers safe, natural healthy water to every faucet in your home.

## Substantial Cost Savings

The CrystalClear Home protects expensive fixtures, appliances, water heaters and plumbing by dramatically reducing scale buildup. A longer equipment life means savings for you and your family, fewer repairs and reduced water and energy usage.

## High Quality Drinking Water

The CrystalClear Home system will deliver chemical free, naturally safe water to every faucet in your home. All the ice, food and beverages you consume will look and taste better.

## Reduces Maintenance

Your pool, spa and water features will require less costly maintenance. With our CrystalClear Home, your pool and spa will remain cleaner. Our system reduces scale buildup and will extend the life of your pumps, plumbing and heating equipment.

## Healthier Plants and Lawns

Plant growth and percolation is greatly improved with the reduction of scale buildup. The CrystalClear Home system allows roots to more effectively absorb water and nutrients. Plus, standing water and algae growth are reduced or eliminated. Conserve water, lower costs and get better results with CrystalClear Home.

## Cleaning Chores Reduced

With the CrystalClear Home filtration and conditioning system there is less spotting and visible scale buildup in sinks, showers and tubs. You will also have better results with your laundry and dishwashing while using significantly less soap and detergents.

## Chlorine and Chloramines

Our system removes these harsh chemicals which would otherwise be absorbed through our skin when you bathe. Other chemicals, odors, tastes, physical impurities and heavy metals are also removed.

## Protects Landscape and Irrigation Systems

Over time pipes, valves and sprinklers get clogged with hard water deposits. The CrystalClear Home system reduces scale buildup and greatly increases the life of your landscape and irrigation components. Also, hard water surfaces are much less prone to staining.
